

CA Mentor Statement & Info from Angelique Priscilla PT

I have been studying with Aminah Raheem since 1993, and believe Soul Lightening Acupressure to be a leading edge modality that supports whole being healing. I have been using SLA in my PT practice since I first began studying it. I have been blessed to be able to teach this material as I love sharing it with all who seek it. I am thrilled to have the opportunity to mentor students for both Clinical Acupressure and Process Acupressure.

I will keep track of a student's progress establishing a folder for each compiling the case reports and other materials, in conjunction with the student tracking their own progress and making copies of everything they send to me.

Mentoring fee is \$65/hour, which will be paid following each phone or in person session for reviewing write-ups, practice, and Q/A. I am always available for answering questions between mentoring times free of charge.

My fee for sessions, in person or distance, is \$80/ hr and \$120/1.5 hr. If this fee is not manageable, then we negotiate a fee that is doable for the student. I would recommend a session for students for practice, for learning how to put a treatment session together, but would not make a session mandatory.

I do offer study groups in VT (and MA if there is interest). Fee for these groups is \$20-\$40. I have not done group conference calls, but am available for this at no cost to the student.

Case studies can be written and sent via email or USPS. I like to have 2- 4 at a time. Please type or write legibly.

I would like to have a phone conversation about the community service and special project requirements prior to the student beginning them. I would also like to be kept abreast of the progress, and notified of their completion with a written report of each.

I will discuss with the student how they would like to complete the exam essay questions, a few at a time or all at once. Which ever method is best for them is how we will manage the exam.

For the practical skills evaluation, please utilize the point form that comes in your packet or print it off line. You have the opportunity to deepen your knowledge of the material to whatever level you prefer. We can establish how you would like to proceed with the material at the beginning of your mentorship.
